## Kit Contains:

Two 5/8-dram pure "Therapeutic Grade" essential oil  
.078 fl. oz. (2.3ml) ea.

# 100% Pure “Therapeutic Grade” Essential Oils

**Aromatherapy Uses:** Open the bottle and take in a few deep breaths. Add a few drops to a diffuser. Place a few drops in bath water or on the shower floor.

**Topical Uses:** Put in your hand enough carrier oil (i.e. coconut or almond oil) to cover the area of concern, add a few drops of essential oil and apply to the area of concern or the bottoms of feet. Inhale the aroma from your hand after applying. Add a few drops of essential oil to water, dip a clean cloth in the water and use as compress.

**CAUTIONS:** Keep out of the reach of children. Quality, 100% pure, “Therapeutic Grade” essential oils are highly concentrated plant extracts and should be diluted with use. They absorb easily through the skin. Ingestion could potentially cause irritation to the digestive system, and is not recommended. Begin slowly, with small amounts; too much oil may trigger a “cleanse” in the body. All people should consult essential oil cautions lists. Young children, pregnant or nursing women, and people with a history of potent prescription use should consult their medical provider before using essential oils and pay special attention to caution lists.
